Neumüller Elektronik GmbH Ihr autorisierter Distributor: info@hq-schutzschalter.de

#### Introduction

Sensata Technologies has developed the TH10 temperature cut-out to respond to the need of increasing power of heating and personal care appliances. As a result of this, Sensata Technologies has further established its leading position in the worldwide thermal protection market.

## **Key Benefits**

- Flexible Mounting:
- 3 Terminal Configurations Available
- Robust Design:

The Bimetal Disc is Protected by the Metal Support

• Full Automated Live:

Provides Stable Setting Value

• Low Price:

The Particular Design Provides High Competitivity

#### **Applications**

The TH10 operates as a sensitive power cut-out for:

Hair dryers

- Fan heaters
- Convector heaters
- Transformers
- Hand dryers

and various other applications. With the TH10 Sensata Technologies provides you with cost-effective protection while offering superior quality and reliability.

## **Design and Operating Principles**

The TH10 consists of two nickelplated supports, held together with ceramic pins. One support holds the high performance Klixon® bimetal disc, which, in combination with the sophisticated contact system, provides superior cycling performance. For self-hold versions see TH11/21. A wide temperature range, standard 5K tolerance, different bimetal resistivity, plus optional terminal configurations make the TH10 suitable for a very wide range of applications.

The operating principle of the TH10 is simple and effective. A current flows through the resistive Klixon® bimetal disc. When a fault condition occurs, the increased ambient temperature causes the bimetal disc to snap open the contacts. As the device cools down to a safe temperature again, the contacts will automatically reset.

Standard Operating Temperature Range	From 45°C to 170°C
Max. Ambient Temperature	200°C
Tolerance on Open Temperature	±5K

# **Declarations**

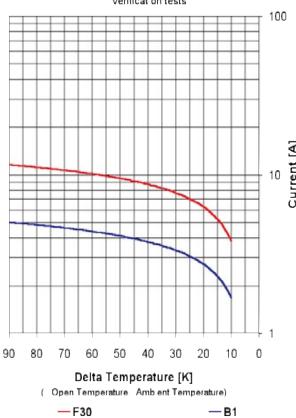

Declarations to EN60730-2-9		Declarations to EN60730-2-2
Purpose of the Control	Thermal Cut-Out	Thermal Motorprotector
Construction	Incorporated, non-electric	
Degree of Protection	IP00	
Terminals for Ext. Conductors	For internal conductors only	
Method of (Dis)Connection of Terminals	Riveting, soldering, spotwelding, springloaded contacting	
Details for Terminals for Internal Conductors	Insulation of conductors used by OEM's must be able to withstand the operating temperatures in normal usage	
Temperature Limits of the Switchhead	200°C	
PTI of Insulation Materials	PTI 250	PTI 250
Method of Mounting	By various means in conjunction with (holes in) terminals, such that adequate creepage and clearance distances are maintained between live parts and accessible metal parts	By various means in conjunction with (holes in) terminals, such that adequate creepage and clearance distances are maintained between live parts and accessible metal parts
Operating Time	For continuous operation	
Type of Action	Type 2B	Type 3C
Reset Characteristic	Automatic	Automatic
<b>Extent of Sensing Element</b>	Whole control	
Control Pollution Degree	Degree 2	Degree 2
