| 5BT SERIES

-65°F to 400°F, SPDT, Welded, Hermetically Sealed 1/2"

Introduction

The Klixon® 5BT series thermostat is a high reliability, hermetically sealed thermal switch. The single pole, double throw design allows versatility and economy in providing two functions within the same device. Typically these Klixon® switches are used to control and indicate at a preset temperature. One pole can control a cooling fan and the other pole can indicate impending danger.

The 5BT thermostat is the ideal choice where quality and reliability in a double throw device are critical. Customer applications for KLIXON® 5BT thermostats include aerospace blower motors and heaters.

Features

- Single pole, double throw (SPDT)
- Hermetically sealed
- Vacuum baked and back-filled with nitrogen
- High resistance to shock and vibration
- Preset, non-adjustable calibration
- Qualified to MIL-PRF-24236 /24

CONFIGURATIONS

The switches are offered in several versions. Our most common configurations are depicted below, but many other styles are available.

Configuration Options

Terminals	Flattened and Pierced (Flattened and pierced terminals can also be bent at right angles to reduce the overall height.)
	Pin-type (Leads can be welded to pin-type terminals to form an integral unit.)
Wire Leads	Standard 18 gauge, stranded wire leads are available in white or black Teflon insulation, in accordance with MIL-W-22759/11 (Teflon is a Trademark of E. I. DuPont de Nemours and Co.)
	Other wires are available upon request. (Wire leads are not available for all styles.)
Finish	The standard plating is copper–nickel, but several other finishes are available.
Mounting Flanges	Top or bottom mounting flanges are available.
Custom Designs	The 5BT device can be custom designed, such as packaging it into a probe thermostat.
